Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION**Continued Examination Under 37 CFR 1.114**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 4/3/09 has been entered.

Election/Restrictions

Applicant's election with traverse of group I (claims 16-24) in the reply filed on 7/6/09 is acknowledged. The traversal is on the ground(s) that examining group II (claims 25-28) is not a serious burden on the examiner is also acknowledged. However, as shown in the restriction requirement, this is not found persuasive because groups I & II belong in separate subclasses.

The requirement is still deemed proper and is therefore made FINAL.

Claims 25-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation from 35 U.S.C. § 112:

Art Unit: 3729

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-24 and 31 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically:

- a. **Claim 8** recites the following limitations that are vague, indefinite, and confusing:
 - “the axis of rotation extending along a line in a third plane, all points of the third plane being both equidistant to and between the front faces of the first and second planes” (claim 8, lines 23-25) – It is unclear as to how a first plane and a second plane which intersect could have a third plane in which all of the points of the third plane are equidistant to the first and second planes. The examiner can understand if each point is equidistant to both the first and second planes. Please be more precise with the claim language.

Claims 8-24 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Specifically, the specification does not describe a third plane with all the points in the third plane being equidistant to both the first plane and the second

Art Unit: 3729

plane. The examiner notes that the third plane would have to be parallel to both planes for all the points in the third plane to be equidistant to both the first plane and the second plane.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
